Income taxes

Interim income tax expense (benefit) is computed by multiplying income (loss) before income taxes and noncontrolling interests for the nine-months period ending December 31, 2020 by a reasonably estimated annual effective tax rate after applying the effect of deferred taxes for FY2020, ending March 31, 2021.

If a reliable estimate cannot be made as in the circumstances that the annual estimated ordinary pretax income (loss) approximates break-even or is forecasted negative, the Company utilizes the actual year-to-date effective tax rate.
