SQBM+TM

High-frequency Trading (HFT) System

Traditional financial investment high-speed decisions are constrained by HFT capabilities. Powered by SQBM+ on FPGA, a HFT system was proven to revolutionize investment strategy with faster speed, wider search capabilities and lower latency in a real trading environment.

World's first quasi-quantum
computer solution for HFT.*

*Based on examination conducted by
Toshiba Corporation, May 2021

Dramatically expand the
boundary of HFT capabilities.

Test in a real environment at
Tokyo Stock Exchange.
