The Cover

TOSHIBA REVIEW 1995 VOL.50 NO.11

Special Issues:
Nuclear Power Generation/Stability Technologies for Electric Power Systems

---

Special Reports

Nuclear Power Generation

- Starting Commercial Operation of Ongawa Nuclear Power Station Unit No.2
- Current Status of and Future Prospects for Nuclear Energy Activities in Toshiba
- Construction of Boiling-Water-Reactor Power Plants
- Present Status of Maintenance Technologies for Boiling-Water-Reactor Power Plants
- Recent Activities of Toshiba Nuclear Engineering Laboratory
- BWR Fuel and Core Technology
- Design and Construction of Onagawa Nuclear Power Station Unit No.2
- Construction of Kashiwazaki-Kariwa Nuclear Power Station Units No.6 and 7

Stability Technologies for Electric Power Systems

- Stabilizing Control Systems COntributing to Stable Electric Power Supplies
- Development of Stabilizing Control Systems for Preventing Expansion of Loss of Synchronism
- Transient Stability Control System Based on On-Line Simulation
- Transient Stability Control System Based on Real-Time Calculation
- Frequency Stability Control System for Large-Scale Power System
- Real-Time Power System Stabilizing Equipment for Dynamic Stability
- Multifunctional Power System Stability Controller
- Verification Techniques for Power System Stability Controllers

Feature Articles

- AX-4100 ATM Switch
- IK-SM40 Super Micro Camera
- Practical Applications of Superconducting Technology
- Multimedia-Compatible Color Television
- J-type X-ray Image Intensifier
