

# TOSHIBA REVIEW

## VOL.54 NO.4

### Special Issues:

#### Environmental Equipment/Mobile Communications

#### Special Reports I

- Toward a Resource-Recycling Society
- **TREN** Present Status and Future Prospects of Environmental Technologies and Equipment
- New Waste Processing Technologies-Pyrolysis Gasification System and Corona Discharge Exhaust Gas Treatment System
- Waste Plastic Treatment Equipment
- Wastewater and Sludge Treatment Technologies
- TGR series Garbage Disposer
- Advanced Technologies for Material Recycling
- Design Support System for Environmentally Conscious Products

#### Special Reports II

- Realizing People-Oriented Mobile Communication Terminals
- Technological Trends Supporting Continuous Growth of Mobile Communications Market
- Cellular Telephones and PHS Terminals
- W-CDMA Terminal
- Single-Chip Transceivers
- Software-Defined Radio
- Application of Flip Chip Bonding Technology to Mobile Communication Terminals

#### Feature Articles

- Fuel Cell Power Plant System for Food Industry Facilities
- 31 cm (12.1-inch) Diagonal Super-Thin TFT-LCD Module for Notebook-Size PCs
- RAK-405D1/AD1 Hybrid Air Conditioner for Cold Climate Regions

#### Techno Notes

Digital Broadcasting
