

TOSHIBA REVIEW

VOL.54 NO.9

Special Issues:

I Design Innovation

Special Reports I

Design Innovation

- Entering System-on-Chip Century
- **TREND** Improvement of Design Process
- Computer-Aided Virtual Product Planning Environment and Rapid Prototyping System
- Concurrent Multidisciplinary Mechanical Design Based on Design Task Analysis and Knowledge Sharing
- Basic Structure Development toward SoC and IP Era
- Development Environment for Next-Generation Embedded Software
- Software Development Environment for Next Decade
- Design Engineering for Large Systems
- Reengineering of Labor-Saving Equipment/System Design Process
- Reengineering of Notebook PC Mechanical Development Process
- New Style of System Business and Reengineering of Software Engineering Process
- System Development Applying Object-Oriented Design
- Global Engineering Environment for Design Information

Feature Articles

- Development of cdmaOne Mobile Terminals
- Construction and Preoperational Test of Spent Fuel Storage Facility for Rokkasho Reprocessing Plant of JNFL
- Development of Semiconductor CIM System Based on Framework

Techno Notes

ITS(Intelligent Transport Systems)
