

TOSHIBA REVIEW

VOL.54 NO.10

Special Issues:

I Integrated Control Systems

II Wireless Access

Special Reports I

Integrated Control Systems

- Advanced Control Platforms for Integrated Automation
- **TREND** New Technological Trends Supporting CIE Integrated Control Systems
- V Series Integrated Controller
- Integrated Engineering Tool
- Application of V Series Integrated Controller
- Software Technologies and Solutions in Toshiba Control Systems
- New Technologies of CIEMAC_{TM}-DS CIE Integrated Control System
- New Technologies of Industrial Computers
- Review of Development of and Intelligence in Field Instruments

Special Reports II

Wireless Access

- A Solution for the First / Last One Mile
- **TREND** Technical Trends in Fixed Wireless Access Systems
- ATM Wireless Access Ring System
- Asymmetric Wireless Link System
- Submillimeter Wave Device and RF Unit for PTMP Systems

Feature Articles

- Application of Environmentally Friendly Multilayer Printed Wiring Board
- Application of Improved Systems and Components to Hamaoka Nuclear Power Station Unit No.5
- UV/Catalyst Process for Destruction of PCB Liquid Wastes

Techno Notes

ITS(Intelligent Transport Systems)
